

ISE Departmental Seminar – Thursday, April 18 at 4:30PM, FWH 4290

Dr. Afi Harrington, US FDA

Abstract: Dr. Harrington will review her career path after NCSU to explore some real-world examples of leveraging analytics in government while also highlighting key lessons learned throughout her career journey. She will offer insights into working both within the federal government and as a contractor and entrepreneur, as well as navigating career transitions. Additionally, she will spotlight government opportunities for students and early career professionals.

Bio: Dr. Harrington received a BS in Mathematics from Spelman College and a MOR and PhD in Operations Research from North Carolina State University. Her professional path includes years of experience as an operations research analyst, consultant, entrepreneur, and advisor/coach. Her career journey has crossed the spectrum of government, private, and nonprofit entities.
